

Risk-persona framing moves Unsafe play far more than the risk treatment

Assigned seat risk-attitude persona (R1 = most risk-averse framing ... R6 = most risk-seeking framing)

Pilot; persona_condition is injected into the same frozen, hash-verified prompt template (prompt_version unchanged).

GPT-5/5.4 nano: n=360 players per bar. Persona is perfectly confounded with run

batch/protocol signature (see text) -- a large, consistent, diagnostic pattern, not yet an isolated causal effect.
